

The UC H4C Knowledge Platform, built on the EU H4C Community of Practice, fosters information exchange among the stakeholders active in the ECoP.

Software value propositions

User need	Software value proposition	Benefit
To boost content type management.	Provide automated or semi-automated updating and retrieval of information.	To provide enriched information towards the community
Convenience in accessing multiple services or products without switching between different platforms.	Acting as main one-shop-point for linking EU commission regional information platforms	It saves time and effort, especially for tasks that usually require multiple steps or providers and improves usability.

User Interface

User journey – Content Management Workflow
